DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on August 29, 2006 and March 01, 2007 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

Specification

3. The Preliminary Amendment filed on August 29, 2006 has been entered.

Examiner's Amendment

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Drake on April 25, 2008.

The application has been amended as follows:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: label the drawing as -- Fig. 1 -- (see attached drawing). In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Reasons For Allowance

5. Claims 1-22 are allowed over the art of record.
6. The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance are that the art of record does not disclose, nor would it be obvious to modify the art of record so as to include the limitations, in combination with the other limitations, an energy meter comprising a phase evaluation block comprising first and second inputs and an output, wherein the first input of the phase evaluation block is electrically connected to the output of the first analog/digital transformer and the second input of the phase evaluation block is connected to the output of the second analog/digital transformer; and a phase correction block comprising a control input electrically connected to the output of the phase evaluation block, wherein the phase correction block is connected to an output of at least one of the first and second analog/digital transformers and the phase correction block is configured to correct a phase deviation of a digitized signal that is derived from at least one of the current and the voltage as claimed in the independent claim 1; or a method for calibrating an energy meter, comprising determining a phase deviation between the first and second digitized test signals, generating a phase correction signal; and applying the phase correction signal to one or more of the first and second digitized test signals as claimed in the independent claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
